

## ROSALIE

(UEB 3459/1) was produced by crossing Aneta with Maypole  
Community Plant Variety Rights EU 35515 from 03. 06. 2013

- Origin:** Institute of Experimental Botany Prague (Strizovice), CZ
- Tree:** Diploid, medium vigorous, compact columnar type with greyed-purple young leaves
- Blossom:** Mid-season, blooms heavily with red-purple flowers
- Picking time:** towards mid-October, fruits do not fall prematurely, hang well on tree until November
- Productivity:** Precocious, produces regular heavy crops of small ornamental fruits
- Fruit:** Yields attractive ornamental fruits, form broadly globose-conical, transverse diameter about 50 mm, skin russet free, ground yellow-green color is almost entirely covered with dark-red, stem short to medium long, flesh reddish, not suitable for fresh eating
- Diseases:** Resistant to scab (*Vf*), tolerant to mildew
- Comment:** Ornamental variety of columnar type without specific requirements for growing conditions. Exhibits an extremely columnar growth habit requiring only an occasional removal of competitive shoots. The variety is suitable for ornamental purpose mainly for home gardens as solitaire or for planting of hedge with recommended distance 50 cm between trees and may be suitable for making jelly.
